

Final Project Presentations

You will be presenting your final projects to the class. Each presentation will be 10 minutes long. The presentations should be summaries of your reports, which are due on Monday Dec. 2 at 11AM. The presentations should describe the equation you solved, describe how you solved the PDE and why you made those numerical choices, demonstrate that you're solving the equations properly, and then show some example simulations. The examples should illustrate the interesting characteristics of the equation you're solving.

Presentations on Mon. Dec. 2:

- Chen, Li, Wang
- Chen
- Landsittel & Martin
- Kuppam, Sorensen, Vaduthala

Presentations on Wed. Dec. 4:

- Feng & Gao
- Althunayyan & Mackenzie
- Ji & Zhang
- Ge & Wu
